

# ACT Science Seminar

Help your students prepare for the ACT Science Section!

**EUREKA!** will come to your campus, FREE of charge, and teach students the steps to scoring well on the ACT Science Section.

The Seminar can be done during or after school.

## STUDENTS WILL LEARN:

- ❖ Biology, Chemistry and Physics **ARE NOT** tested.
- ❖ The Science Section has **nothing to do with science** and everything to do with reading data and understanding charts.
- ❖ The ACT is a great alternative for students who are more comfortable with **curriculum-based questions**.
- ❖ Proven techniques to raise their scores using **actual ACT questions**.

Eureka's Science Seminar relieved a lot of the anxiety that our students were feeling about the ACT. The Science Section is the scariest part of the test for most students. Eureka's presentation gave our students the confidence they needed to score well on the test. Thank you!

– Amy Golden, Assistant Principal, Beverly Hills High School
